PROFESSIONAL SUMMARY

Principal UI/UX designer with 15 years of experience across smart manufacturing, medical devices, consumer goods and consumer IoT, banking and fintech, insurance, logistics, retail, automotive, media, research and enterprise software. At Jabil I am the design authority for my business unit, leading AI-driven dashboards, IoT and Industry 4.0 experiences, and an enterprise design system used by global product teams. I also work hands-on with Android device firmware and Python, and I test embedded software and troubleshoot products when they fail, so my designs ship within real hardware and data constraints. I have trained 15+ designers and raised usability scores by 30%.

SKILLS

UX and UI design: UX design, UI design, interaction design, information architecture, wireframing, prototyping, user flows, journey mapping, personas, responsive and mobile-first design, data visualisation, motion design, design handoff, design reviews

Design systems and accessibility: Enterprise design systems, design tokens, component libraries, UI documentation, design governance, accessibility standards (WCAG 2.2)

Research and validation: User research, interviews, stakeholder workshops, usability testing (qualitative and quantitative), usability engineering (IEC 62366), use-error analysis, Design Thinking

Product domains: Enterprise dashboards, web applications, iOS and Android apps, embedded device interfaces, shop-floor HMI for Android industrial panels, IoT and connected products, AI/ML-driven and predictive interfaces, digital twin UI, regulated medical device UX, AR/VR/XR concepts

Testing and troubleshooting: Embedded software testing, test plans and test cases, regression testing, Android device and firmware troubleshooting, ADB and log analysis, fault reproduction, root cause analysis, bug reports

Technical: Python (automation, testing, data analysis), C/C++ (working knowledge), HTML, CSS, JavaScript, Bash, Azure and AWS cloud product design, BLE and MQTT (working knowledge)

Process and leadership: Agile Scrum, design authority, stakeholder management, requirements translation, PRDs, mentoring, UX maturity building, Lean Six Sigma (Bronze)

Tools: Figma, Adobe Creative Cloud (Photoshop, Illustrator), Sketch, Zeplin, Miro, Notion, Jira, Confluence

Learning now: Embedded AI, on-device models, chips and boards, datasheets, testing AI behaviour

PROFESSIONAL EXPERIENCE

Principal Design Engineer Oct 2018 to present

Jabil Circuit Sdn. Bhd., Bayan Lepas, Penang, Malaysia

- Serve as design authority for the business unit, owning UX strategy and UI for mission-critical enterprise products from concept to production-ready UI within agile, cross-functional teams.
- Own and evolve the enterprise design system used by global product teams, covering UI patterns, accessibility standards, interaction principles, documentation and design governance.
- Design AI-driven dashboards and predictive interfaces that turn machine-learning outputs and operational data into clear, actionable decisions for operators and managers.
- Design IoT and Industry 4.0 experiences for production visibility, equipment monitoring and smart-manufacturing workflows, including live sensor data, alert and threshold states, and device pairing flows.
- Review solutions before production for UI compatibility with shop-floor Android industrial panels, including an NVIDIA-based digital twin, where I identified the rendering model (pixel-streamed or locally rendered) as the key scoping decision.
- Lead end-to-end UX from discovery, research and journey mapping through prototypes, usability testing and handoff; partner with customers, operators, and engineering, data and cloud (Azure and AWS) teams to define requirements.
- Established usability testing programs across local and remote environments, using qualitative and quantitative insights to validate and improve products.
- Mentored and trained 15+ designers across local and global teams, establishing UX best practices and raising usability scores by 30%.
- Test embedded software and troubleshoot firmware issues on Android-based devices across the software and hardware boundary; use Python for automation, prototyping, testing and data analysis.
- Explore AR/VR/XR concepts for operator training, maintenance and assistance; lead motion and content strategy for digital products.

Senior UI/UX Designer (Consultant) Aug 2017 to Sep 2018

Citicorp Services India Ltd. (via Pixint Graphics Pvt. Ltd.), Pune, India

- Turned customer briefs into banking interfaces, including a compliance monitoring web application, presenting high-fidelity designs to customers after internal review of wireframes and low-fidelity prototypes.
- Designed secure, compliant UI for fraud-detection and risk dashboards aligned with global finance regulations.

- Streamlined analyst user flows in data-centric tools, reducing analysis time by 25%.
- Built personas and scenarios from interviews and research, and refined prototypes with product owners in an agile cycle.

UI Designer Aug 2015 to Jul 2017

Mobile Programming LLC, Gurugram, India

- Designed 30+ web and mobile apps for global brands including SAP, Toyota and Amgen.
- Focused on UX flows for banking, logistics and insurance products.
- Created personas, prototypes and high-fidelity mockups; led customer design reviews.

Web and UI/UX Designer Sep 2014 to Aug 2015

Technovature Software Solutions, Bengaluru, India

- Owned website and app UX/UI from concept to delivery; created brand guidelines and product identity assets.

Web and UI/UX Designer Nov 2012 to Apr 2014

Gradient Softech Pvt. Ltd., Kota, India

- Managed web design and development projects, ensuring technical accuracy and user engagement; built layouts in HTML, CSS and JavaScript and maintained live websites.

Web Designer and Faculty Aug 2010 to Dec 2011

Nis Creative Info Pvt. Ltd., Bhavnagar, India

- Taught UI/UX fundamentals while leading real-world design projects; designed websites and retouched images.

SELECTED PROJECTS

Makna Personal product, 2026, not published

Live conversation translation for iOS and Android that keeps the microphone open instead of push-to-talk. Product and design lead: interaction model, 19 light and dark screens, a design system with a token-drift check, privacy and consent flows, and a 50-turn earbud soak test on a real iPhone (30 of 50 turns passed on the first run).

Ishraq Personal product, 2026, in Google Play internal testing

Prayer times, Hijri calendar, Quran and duas for iOS and Android in English, Hindi and Malay. Product and design lead: analysis of about 3,700 app reviews, Ask the Quran (curated verses, no generated text), a Figma design system with a computed contrast audit, and prayer times and Hijri dates checked against official JAKIM tables.

Connected medical device interface Client work, Jabil, 12 months

UX designer for the human interface of a regulated, Bluetooth-connected medical device with no screen (LED, haptic and button behaviour) and its companion app. State matrix, use-error analysis and nine revisions of the requirements specification.

FoodFinity by Purina Nestle Purina through Jabil, 16 weeks

Sole UX/UI designer for an IoT food-level sensor with a mobile app and web dashboard that reorders dog food automatically. 12 owner interviews, a three-step setup wizard, subscription states and three rounds of usability testing.

Smart replenishment platform Client work, Jabil Software Services, 5 months

Lead UX designer in a nine-person team on a consumer app and brand dashboard for packaging with embedded sensors. Bluetooth onboarding, three user types, and interface states designed to the cloud's 15-minute polling and failure modes.

EDUCATION

Postgraduate Diploma in Multimedia, Xplora Design Skool 2010

Bachelor of Computer Applications (BCA), Sikkim Manipal University 2010

CERTIFICATIONS

UX Research and UX Design Process, Google 2024 to 2025

Lean Six Sigma (Bronze), Jabil

Public Speaking, Data Visualization and Presentation, LinkedIn Learning

LANGUAGES

English (fluent), Hindi (fluent)
